

CO113 - Architecture

Prelude

The content discussed here is part of CO113 - Architecture (Computing MEng); taught by Wayne Luk, and Jana Giceva, in Imperial College London during the academic year 2018/19. The notes are written for my personal use, and have no guarantee of being correct (although I hope it is, for my own sake). This should be used in conjunction with the lecture slides, *The Hardware/Software Interface Class* by Luis Ceze and Gaetano Borriello on YouTube, and *Computer Organization and Design : The Hardware / Software Interface (Fifth Edition)*, by Patterson, D., and Hennessy, J.
